EDUCATION

University of Arizona

Tucson, AZ 85721

BS IN SOCIAL AND BEHAVIORAL
SCIENCES

KEY SKILLS

JavaScript
ReactJS
HTML
CSS
SASS
Bootstrap
SQL
Knowledge of API's
Knowledge of VCS's

PROFILE

I am focused to improve my skills not only as a Front-end Developer, but as a Computer Programmer. I am determined to deliver and excited for the continuation of my growth.

EXPERIENCE

FRONT-END DEVELOPER

**Recipes •
https://internationalrecipes.netlify.app/**

Recipes, built through ReactJS with MealDB's API, is a culinary site that lets you search recipes by Nationality, Ingredient, Type or Search. Bootstrap and SASS were used to implement the UI and UX. It was generated by create-react-app and hosted by Netlify.

The Navbar contains a link to a Random Recipes page which displays a recipe out of MealDB's database of recipes. This page contains a link to the Full Recipe and a Video (if available). There are three exclusive filter categories: Nationality, Ingredient, and Type. Pagination was implemented and 20 meals are displayed per page. Selecting a meal will bring you to the MealDetails page, which lists the ingredients and also displays a Video and Full Recipe link (if available).

FRONT-END DEVELOPER

Chipotle-Clone • https://chipotle-clone.netlify.app/

Generated with create-react-app and hosted by Netlify, this Chipotle-Clone site was implemented with React. I created this mock site in order to strengthen my design skills and to become familiar with developing sites from a wireframe. A combination of Bootstrap and SASS were utilized to mimic the finer details and to execute their designed UX and UI.
